

Airserver Guide with OneTouch

- Airserver can be accessed from your OneTouch system by selecting the Presentation button, then select Airserver.

Screen Mirroring from a IOS device

- If you are using iOS 11 or newer, follow these steps:

Connect your iOS device and your computer running AirServer to the same Wi-Fi network.

- On your iOS device, swipe up from the bottom of your screen to access the Control Center.
- Please note that on any iPhone with Face ID and any iPad you access Control Center by swiping down from the top right corner of the screen.
- Tap the Screen Mirroring icon. You should now see a list of AirPlay enabled receivers available on your network.

Tap the name of the AirPlay receiver you wish to AirPlay to. This would be the name of the computer running AirServer. This is only available if your iOS device and computer support mirroring.

Users with Android devices:

- Download the Google Home app from the Google Play Store.
- Open the Google Home app.
- Find your AirServer receiver in the list of devices at the bottom after opening the app and press it.
- Tap "Cast my screen"

Mirroring from a Windows device can be done by following the steps below:

- Press the Windows Key + K to bring up a sidepanel.
- Select your AirServer from the list
- Press Connect
